

Post-doctoral Position in Statistical Genomics and Bioinformatics

The Department of Biostatistics within the School of Medicine at The University of Kansas Medical Center (KUMC) is seeking applications for a post-doctoral research scientist position. We are in the process of building a statistical genomics and bioinformatics research group and are seeking a postdoctoral candidate with a Ph.D. in statistics, bioinformatics or biostatistics with interest in human genomics research. Solid statistical training, strong computer programming skill, excellent written and oral communication skills are required.

KUMC is located in Kansas City KS, with the goal of servicing Kansas through excellence in education, patient care, community engagement and research. The candidate will work with a team of scientist for advancing bioinformatics research activities at The University of Kansas Medical Center, along with the collaboration on genomic research projects.

Specific questions related to this position should be directed to:

Brooke L. Fridley, PhD

Associate Professor of Biostatistics

Director, Biostatistics and Informatics Shared Resource, The University
of Kansas Cancer Center

Interim Site Director for K-INBRE Bioinformatics Core
